Foundry 📅 May 2018 - September 2018

Rejoined foundry for second time to work on flix project using angular.

The Bio Agency (Includes 1 contract renewal) 📅 December 2017 - May 2018

Developed ecommerce single page application for Arrow, one of the biggest electronic component distributers. A b2b angular project developed to manage orders, quotes, bill of materials, notifications and forecasts. Key achievements;

- Developed a greenfield single page application with angular 5, typescript, and webpack
- State management with ng store and rxJs dev tools
- Maintained 92% of code coverage with unit tests

Foundry 📅 September 2017 - December 2017

Worked on Flix, a visual story development tool for feature film, TV production, games. Designed to promote fast-paced creative collaboration amongst directors, producers, story artists and editors. Key achievements;

- Developed a greenfield desktop application with angular 4, typescript, electron and webpack.
- Developed reusable components with a focus on performance for the best user experience.
- Unit testing components and services with a BDD approach.
- Gained development experience with electron and clarity ui.

Winton 📅 June 2017 - August 2017

Worked on Winton careers project. A greenfield angular project that allows external candidates to view and apply for current job opportunities. Key achievements;

- Developed a greenfield single page app with angular 4, typescript and webpack.
- Developed re useable private npm packages in order to be consumed by a number of internal single page apps.

Addison Lee 📅 March 2017 - June 2017

Worked on the Global Booking System for Addison Lee. A greenfield angular 2 project that consolidates and unifies the booking experience for both b2b and b2c customers. Key achievements;

- Developed a greenfield single page app with angular 2 and typescript.
- Maintained 80% of code coverage with unit tests.
- Developed end to end [e2e] tests to automate ui testing.
- Developed a modular app with reusable components in order to facilitate whitelabelling.
