NHS digital service manual		Webdriver IO	Docker	Invision

Other Skills

Git, Git flow, Prettier, Husky, AWS Cognito, Clarity UI, MySQL, Zeplin, Grunt, Gulp, Electron, Font awesome, Icomoon, Masonry

Experience

Greensill   📅 September 2020 - February 26th 2021

Hired as a senior front end developer to join a cross-functional agile team for Greensill, a market-leading provider of working capital finance. Enhanced and scaled project Verdi by developing new features using angular 11.

- Maintained 80% code coverage of unit tests using Jest.
- Developed end to end browser automation tests with Cypress using a BDD approach.
- Involved in common components library project leveraging storybook, ngx data table.
- **Skills used:** Angular, Typescript, Javascript, RxJS, Test Driven Development, Jest, Cypress, HTML5, SCSS, CSS3, BEM, CSS Grid, Responsive Design, Angular Material, Git, Node, Storybook, NGX data table

HEE (Health Education England)   (Includes 2 contract renewals) 📅 February 2020 - September 2020

Hired to redevelop a core part of the Trainee Information System (TIS) for HEE using a test driven development approach. A greenfield single page angular 10 application designed to manage trainee doctors, concerns and notifications.

- Implemented state management using NGXS alongside Redux dev tools.
- Developed e2e tests using Cypress to automate ui testing.
- **Skills used:** Angular, Typescript, Javascript, RxJS, NGXS, Test Driven Development, Jasmine, Karma, Cypress, HTML5, SCSS, CSS3, BEM, CSS Grid, Responsive Design, Angular Material, Git, AWS, Terraform, Mocky

Heineken 📅 December 2019 - February 2020

Hired as the senior front end developer in order to drive the front end development for project Refresh. A greenfield single page angular 8 application for Heineken with the purpose to completely modernize an existing legacy code base.

- Mentoring other developers with regards to front end development including angular and e2e testing.
- Assisted QA automation on jira stories by writing e2e tests using protractor, gherkin and chai.
- Collaborating with external design agency in order to ensure designs are feasible for development.
- **Skills used:** Angular, Typescript, Javascript, RxJS, Test Driven Development, Jasmine, Karma, HTML5, SCSS, CSS3, BEM, CSS Grid, Responsive Design, Git

RSSB (Rail safety & standards board)   (Includes 1 contract renewal) 📅 September 2019 - November 2019

Hired to work on a technical refactor project for the main RSSB website.

- Complete rewrite of existing HTML markup and css using modern HTML5, SASS and BEM methodology.
- Complete rewrite of existing javascript via latest modern ES6 coding standards
- **Skills used:** Javascript, ES6, HTML5, SCSS, CSS3, BEM, CSS Grid, Responsive Design, Git

Sopra Steria   (Includes 2 contract renewals) 📅 April 2019 - September 2019

Developed a single page application for Skills for care, an adult social care organisation. An angular 8 project built with cutting edge modern tech in order to facilitate workforce development.

- Gained development experience with GDS [GOV.UK design system]
- Adhered to Web Content Accessibility Guidelines (WCAG 2.1)
- **Skills used:** Angular, Typescript, Javascript, RxJS, Test Driven Development, Jasmine, Karma, HTML5, GDS [GOV.UK design system], SCSS, CSS3, BEM, CSS Grid, Responsive Design, Git

Virtusa 📅 February 2019 - March 2019

Worked on APIX, an angular 6 application designed for collaboration between financial Institutions and FinTechs.

- Developed new features and addressed high priority bug fixes under tight deadlines in order to hit release target
- **Skills used:** Angular, Typescript, Javascript, RxJS, HTML5, SCSS, CSS3, Responsive Design, Git

Runpath   (Includes 1 contract renewal) 📅 September 2018 - January 2019

Developed a mortgage underwriting tool for Experian with a TDD approach. An angular 6 single page application developed to manage and list mortgage applications, view income and expenditure transactions via open banking and data visualisation.

- Responsible for client-side code delivery as well as smooth integration with BE restful API`s
- Utilised ng charts library in order to present data visualisation on the ui
- **Skills used:** Angular, Typescript, Javascript, RxJS, Test Driven Development, Jasmine, Karma, HTML5, SCSS, CSS3, BEM, CSS Grid, Responsive Design, Angular Material, Git, Mocky

Foundry 📅 May 2018 - September 2018

Worked on Flix, a visual story development tool for feature film, TV production, games. Designed to promote fast-paced creative collaboration amongst directors, producers, story artists and editors.

- Developed a greenfield desktop application with angular 4, typescript, electron and webpack.
- Unit testing components and services with a BDD approach.
- Gained development experience with electron and clarity ui.
- **Skills used:** Angular, Typescript, Javascript, RxJS, Electron, Test Driven Development, Jasmine, Karma, HTML5, SCSS, CSS3, BEM, Clarity UI, Responsive Design, Git
